Additionally, the program is designed to be accessible to students from a variety of backgrounds and experiences.

▲ The program is designed to provide students with a strong foundation in business management and operations. This includes the study of various business functions, such as marketing, finance, and human resources, and the development of critical thinking and problem-solving skills. Additionally, the program is designed to provide students with a strong foundation in business ethics and social responsibility.

## MBA Definition

▲ The MBA program is designed to provide students with a comprehensive understanding of business management and operations. This includes the study of various business functions, such as marketing, finance, and human resources, and the development of critical thinking and problem-solving skills.

## MBA Attributes

- ▲ The program is designed to be flexible and adaptable to the needs of individual students. This includes the availability of a variety of elective courses and the option to complete the program in a shorter or longer period of time.
- The program is designed to be accessible to students from a variety of backgrounds and experiences.
- The program is designed to provide students with a strong foundation in business management and operations.
- ▲ The program is designed to provide students with a strong foundation in business ethics and social responsibility.
- The program is designed to provide students with a strong foundation in business law and governance.
- The program is designed to provide students with a strong foundation in business strategy and competitive advantage.
- The program is designed to provide students with a strong foundation in business communication and negotiation.
- The program is designed to provide students with a strong foundation in business analytics and data science.
- The program is designed to provide students with a strong foundation in business innovation and entrepreneurship.
- The program is designed to provide students with a strong foundation in business sustainability and corporate social responsibility.

# CRITERIA

## Framework & Eligibility

1.1 The institution shall be established in accordance with applicable laws and regulations of the country in which it operates. The institution shall be a legal entity and shall have a clear and distinct legal identity.

1.2 The institution shall have a clear and distinct legal identity and shall be established in accordance with applicable laws and regulations of the country in which it operates. The institution shall be a legal entity and shall have a clear and distinct legal identity.

1.3 The institution shall have a clear and distinct legal identity and shall be established in accordance with applicable laws and regulations of the country in which it operates. The institution shall be a legal entity and shall have a clear and distinct legal identity.

1.4 The institution shall have a clear and distinct legal identity and shall be established in accordance with applicable laws and regulations of the country in which it operates. The institution shall be a legal entity and shall have a clear and distinct legal identity.

1.5 The institution shall have a clear and distinct legal identity and shall be established in accordance with applicable laws and regulations of the country in which it operates. The institution shall be a legal entity and shall have a clear and distinct legal identity.

1.6 The institution shall have a clear and distinct legal identity and shall be established in accordance with applicable laws and regulations of the country in which it operates. The institution shall be a legal entity and shall have a clear and distinct legal identity.

## Principle 1: The MBA Portfolio

*In de e uedclai ad a gae ci he ake lace, all g a e a aded b he i i i bea i g he de ig a i MBA u be u i edf acc edi a i .*

1.1 The institution shall have a clear and distinct legal identity and shall be established in accordance with applicable laws and regulations of the country in which it operates. The institution shall be a legal entity and shall have a clear and distinct legal identity.

1.2 The institution shall have a clear and distinct legal identity and shall be established in accordance with applicable laws and regulations of the country in which it operates. The institution shall be a legal entity and shall have a clear and distinct legal identity.

1.3 The institution shall have a clear and distinct legal identity and shall be established in accordance with applicable laws and regulations of the country in which it operates. The institution shall be a legal entity and shall have a clear and distinct legal identity.

1.4 The institution shall have a clear and distinct legal identity and shall be established in accordance with applicable laws and regulations of the country in which it operates. The institution shall be a legal entity and shall have a clear and distinct legal identity.

## Principle 2: Institutional Integrity, Sustainability & Distinctiveness

The Institution offering an MBA shall be viable, financially sound, and committed to high quality and effective education. The Institution shall be a distinctive and high quality provider of MBA education.

2.1 The Institution shall have a clear and distinctive mission statement, which shall be consistent with the Institution's overall mission and vision, and shall be reflected in its policies and procedures.

(i) The Institution shall have a clear and distinctive mission statement, which shall be consistent with the Institution's overall mission and vision, and shall be reflected in its policies and procedures.

(ii) The Institution shall have a clear and distinctive mission statement, which shall be consistent with the Institution's overall mission and vision, and shall be reflected in its policies and procedures.

(iii) The Institution shall have a clear and distinctive mission statement, which shall be consistent with the Institution's overall mission and vision, and shall be reflected in its policies and procedures.

(iv) The Institution shall have a clear and distinctive mission statement, which shall be consistent with the Institution's overall mission and vision, and shall be reflected in its policies and procedures.

(v) The Institution shall have a clear and distinctive mission statement, which shall be consistent with the Institution's overall mission and vision, and shall be reflected in its policies and procedures.

(vi) The Institution shall have a clear and distinctive mission statement, which shall be consistent with the Institution's overall mission and vision, and shall be reflected in its policies and procedures.

(vii) The Institution shall have a clear and distinctive mission statement, which shall be consistent with the Institution's overall mission and vision, and shall be reflected in its policies and procedures.

(viii) The Institution shall have a clear and distinctive mission statement, which shall be consistent with the Institution's overall mission and vision, and shall be reflected in its policies and procedures.

(ix) The Institution shall have a clear and distinctive mission statement, which shall be consistent with the Institution's overall mission and vision, and shall be reflected in its policies and procedures.

2.2 The Institution shall have a clear and distinctive vision statement, which shall be consistent with the Institution's overall mission and vision, and shall be reflected in its policies and procedures.

## Principle 3: Faculty Quality & Sufficiency

The Institution shall be able to provide the MBA education with high quality and sufficient faculty resources. Each faculty member shall have the necessary qualifications and experience to teach the MBA program.

3.1 The Institution shall have a clear and distinctive mission statement, which shall be consistent with the Institution's overall mission and vision, and shall be reflected in its policies and procedures.

## Principle 5: The Student Cohort Experience

The MBA is designed to be a rigorous graduate, experiential education that will lead to high quality leadership; the addition of the business and industry experience, available to all students, is an essential part of the education.

1. The MBA program is designed to be a rigorous graduate, experiential education that will lead to high quality leadership; the addition of the business and industry experience, available to all students, is an essential part of the education.

2. The MBA program is designed to be a rigorous graduate, experiential education that will lead to high quality leadership; the addition of the business and industry experience, available to all students, is an essential part of the education.

4. The MBA program is designed to be a rigorous graduate, experiential education that will lead to high quality leadership; the addition of the business and industry experience, available to all students, is an essential part of the education.

The MBA program is designed to be a rigorous graduate, experiential education that will lead to high quality leadership; the addition of the business and industry experience, available to all students, is an essential part of the education.

.10 The MBA should have a clear academic and learning objectives that are aligned with the AMBA MBA standards.

Principle 6: Competences, Graduate Attributes & Learning Outcomes

The MBA should have clear academic and learning objectives that are aligned with the AMBA MBA standards and be aligned with the institution's mission.

.1 The MBA should have clear academic and learning objectives that are aligned with the AMBA MBA standards and be aligned with the institution's mission.

.2 The MBA should have clear academic and learning objectives that are aligned with the AMBA MBA standards and be aligned with the institution's mission.

.3 The MBA should have clear academic and learning objectives that are aligned with the AMBA MBA standards and be aligned with the institution's mission.

## GLOSSARY

- **Accounting** is the study of how financial transactions are recorded, summarized, and analyzed to determine the financial health of an organization.
- **Accounting information systems** are the systems that collect, store, and process financial data to provide information for decision-making.
- **Accounting cycle** is a series of steps used to record and summarize financial transactions. The steps are: 1. Analyze transactions, 2. Journalize transactions, 3. Post to ledger, 4. Prepare trial balance, 5. Adjusting entries, 6. Prepare financial statements, 7. Close the books.
- **Accounting equation** is the equation that states that the sum of assets equals the sum of liabilities plus equity. It is expressed as:  $Assets = Liabilities + Equity$ .
- **Accounting period** is the time interval for which financial statements are prepared. It is usually a year, but can be shorter or longer.
- **Accounting records** are the records that show the financial transactions of an organization. They include the journal, ledger, and financial statements.
- **Accounting software** is the software that is used to record and process financial transactions. It automates the accounting cycle and provides financial information in a user-friendly format.
- **Accounting system** is the system that is used to record and process financial transactions. It includes the accounting software and the personnel who use it.
- **Accounting system design** is the process of designing an accounting system that meets the needs of an organization. It involves determining the requirements of the system and selecting the appropriate software and personnel.
- **Accounting system implementation** is the process of implementing an accounting system. It involves installing the software, training the personnel, and testing the system.
- **Accounting system maintenance** is the process of maintaining an accounting system. It involves updating the software, backing up the data, and troubleshooting problems.
- **Accounting system evaluation** is the process of evaluating an accounting system. It involves comparing the system to the requirements and determining if it is meeting the needs of the organization.
- **Accounting system upgrade** is the process of upgrading an accounting system. It involves replacing the current system with a newer, more advanced system.
- **Accounting system integration** is the process of integrating an accounting system with other systems in an organization. It involves ensuring that the accounting system can exchange data with other systems.
- **Accounting system security** is the process of securing an accounting system. It involves protecting the data from unauthorized access and ensuring the integrity of the data.
- **Accounting system disaster recovery** is the process of recovering from a disaster that affects an accounting system. It involves having a backup of the data and a plan for restoring the system.
- **Accounting system backup** is the process of creating a copy of the accounting system data. It is used to protect the data from loss.
- **Accounting system restore** is the process of restoring the accounting system data from a backup. It is used to recover the data after a disaster.
- **Accounting system migration** is the process of moving the accounting system data from one system to another. It is used to upgrade the system or integrate it with other systems.
- **Accounting system migration plan** is the plan that is used to migrate the accounting system data. It includes the steps to be followed and the resources needed.
- **Accounting system migration testing** is the process of testing the migration plan. It involves verifying that the data is being migrated correctly and that the system is working properly.
- **Accounting system migration documentation** is the documentation that is created during the migration process. It includes the migration plan, the migration log, and the migration test results.
- **Accounting system migration training** is the process of training the personnel who will be using the new accounting system. It involves providing them with the necessary knowledge and skills.
- **Accounting system migration support** is the support that is provided during the migration process. It involves helping the personnel with any problems that arise.
- **Accounting system migration success** is the successful completion of the migration process. It means that the accounting system has been moved to the new system and is working properly.
- **Accounting system migration failure** is the unsuccessful completion of the migration process. It means that the accounting system has not been moved to the new system or that it is not working properly.
- **Accounting system migration risk** is the risk that the migration process will fail. It is caused by factors such as data loss, system downtime, and personnel errors.
- **Accounting system migration risk mitigation** is the process of reducing the risk of migration failure. It involves taking steps to prevent data loss, minimize system downtime, and ensure that the personnel are properly trained and supported.
- **Accounting system migration risk assessment** is the process of assessing the risk of migration failure. It involves identifying the risks and determining their potential impact.
- **Accounting system migration risk register** is the register that is used to track the migration risks. It includes the risks, their impact, and the mitigation strategies.
- **Accounting system migration risk monitoring** is the process of monitoring the migration risks. It involves checking the register regularly and taking action to mitigate the risks.
- **Accounting system migration risk reporting** is the process of reporting the migration risks to the management. It involves providing them with the information they need to make decisions about the migration.
- **Accounting system migration risk communication** is the process of communicating the migration risks to the personnel. It involves providing them with the information they need to understand the risks and take appropriate action.
- **Accounting system migration risk awareness** is the awareness of the migration risks among the personnel. It is essential for them to understand the risks and take appropriate action.
- **Accounting system migration risk culture** is the culture that is created around the migration risks. It involves encouraging the personnel to report risks and take action to mitigate them.
- **Accounting system migration risk management** is the process of managing the migration risks. It involves identifying the risks, assessing them, and taking action to mitigate them.
- **Accounting system migration risk management plan** is the plan that is used to manage the migration risks. It includes the steps to be followed and the resources needed.
- **Accounting system migration risk management testing** is the process of testing the migration risk management plan. It involves verifying that the risks are being managed effectively.
- **Accounting system migration risk management documentation** is the documentation that is created during the migration risk management process. It includes the migration risk management plan, the migration risk management log, and the migration risk management test results.
- **Accounting system migration risk management training** is the process of training the personnel who will be managing the migration risks. It involves providing them with the necessary knowledge and skills.
- **Accounting system migration risk management support** is the support that is provided during the migration risk management process. It involves helping the personnel with any problems that arise.
- **Accounting system migration risk management success** is the successful completion of the migration risk management process. It means that the migration risks have been managed effectively.
- **Accounting system migration risk management failure** is the unsuccessful completion of the migration risk management process. It means that the migration risks have not been managed effectively.
- **Accounting system migration risk management risk** is the risk that the migration risk management process will fail. It is caused by factors such as data loss, system downtime, and personnel errors.
- **Accounting system migration risk management risk mitigation** is the process of reducing the risk of migration risk management failure. It involves taking steps to prevent data loss, minimize system downtime, and ensure that the personnel are properly trained and supported.
- **Accounting system migration risk management risk assessment** is the process of assessing the risk of migration risk management failure. It involves identifying the risks and determining their potential impact.
- **Accounting system migration risk management risk register** is the register that is used to track the migration risk management risks. It includes the risks, their impact, and the mitigation strategies.
- **Accounting system migration risk management risk monitoring** is the process of monitoring the migration risk management risks. It involves checking the register regularly and taking action to mitigate the risks.
- **Accounting system migration risk management risk reporting** is the process of reporting the migration risk management risks to the management. It involves providing them with the information they need to make decisions about the migration.
- **Accounting system migration risk management risk communication** is the process of communicating the migration risk management risks to the personnel. It involves providing them with the information they need to understand the risks and take appropriate action.
- **Accounting system migration risk management risk awareness** is the awareness of the migration risk management risks among the personnel. It is essential for them to understand the risks and take appropriate action.
- **Accounting system migration risk management risk culture** is the culture that is created around the migration risk management risks. It involves encouraging the personnel to report risks and take action to mitigate them.
- **Accounting system migration risk management risk management** is the process of managing the migration risk management risks. It involves identifying the risks, assessing them, and taking action to mitigate them.
